Mint of the United States at Philadelphia,

MELTING AND REFINING DEPARTMENT,

Philadelphia, 24th Feb. , 1880.

Sir,

Please receive herewith the Reports on Bullion melted in the Month of January 1880.

While the amount of bullion melted, 3 1/3 millions of ounces, is noteworthy, and the character of melting is good, and altho' the irregularities in melting are due to the crowded state of our vaults, and thereby accidental intermingling of accounts in daily meltings, — yet the losses in silver-melting perplex us very often, and constantly maintain an anxious state of solicitude, and daily induce thorough searches to determine whether they are not partly due to clerical errors (in weighing, noting &c.). Such errors we have found, but even allowing for some of these, and allowing for the well-known losses in transferring to the Coiner, there are occasional losses, which seem to be outside of these. We have established

established precautionary and tentative measures to ascertain the sources of our losses. Of course we believe that the accounts will show the losses to be far within the legal limits, but nevertheless we cannot rest content with this result, & shall pursue the investigation to the utmost.

Respectfully yours
I. A. C. Booth

Hon. A. Loudon Snowden
Superintendent.
